

The diagram illustrates the **Framework of Counterfactual Generation**, structured as a house with a triangular roof and a rectangular base.

Roof (Title): Framework of Counterfactual Generation

Columns (Components):

- Feasibility:** $-\lambda_1 \mathbb{E}_{z \sim Ball(\tilde{x}, \delta)} [EU(z)]$
- Similarity:** $+\lambda_2 \max_{z \sim Ball(\tilde{x}, \delta)} [AU(z)]$
- Connected:** $-\lambda_1 \mathbb{E}_{z \sim Ball(\tilde{x}, \delta)} [EU(z)]$
- Plausible:** $-\lambda_1 EU(\tilde{x})$
- Robust:** $-\mathbb{E}_{z \sim Ball(\tilde{x}, \delta)} [TU(z)]$
- Discriminative:** $-\lambda_2 AU(\tilde{x})$

Base (Validity): $\text{argmax}_{\tilde{x} \in \mathcal{X}} p(\tau | \tilde{x})$

Feasibility

$$-\lambda_1 \mathbb{E}_{z \sim Ball(\tilde{x}, \delta)} [EU(z)]$$

Feasibility

$$-\lambda_1 \mathbb{E}_{z \sim Ball(\tilde{x}, \delta)} [EU(z)]$$

Similarity

$$+ \lambda_2 \max_{z \sim \text{Ball}(\tilde{x}, \delta)} [AU(z)]$$

Similarity

$$+ \lambda_2 \max_{z \sim \text{Ball}(\tilde{x}, \delta)} [AU(z)]$$

Connected

$$-\lambda_1 \mathbb{E}_{z \sim \text{Ball}(\tilde{x}, \delta)} [EU(z)]$$

Connected

$$-\lambda_1 \mathbb{E}_{z \sim \text{Ball}(\tilde{x}, \delta)} [EU(z)]$$

Plausible
 $-\lambda_1 EU(\tilde{x})$

Plausible
 $-\lambda_1 EU(\tilde{x})$

Robust

Robust

— 222 —

— 222 —

Validity
$\operatorname{argmax}_{\tilde{x} \in \mathcal{X}} p(\tau \tilde{x})$

Validity
$\operatorname{argmax}_{\tilde{x} \in \mathcal{X}} p(\tau \tilde{x})$
